

Government and Public Sector

Video Conferencing for Government and Public Sector

Secure, reliable and cost effective communications for government agencies and institutions

Build authentic relationships in 4K

Improve engagement in emergency operations, behavioural health and judicial proceedings where quality and reliability truly matter.

Deploy government-compliant security

All GMeet video streams are securely encrypted by default to exceed government security requirements.

Extend your message to larger audiences

Easily record and live stream town-halls and other high-level meetings with 4K video and 4K full-motion content sharing quality.

Reduce unnecessary and expensive travel

Reach underserved and remote areas without wasting time or resources with quick and efficient video conference calls.

Benefits of video conferencing for Central and local government agencies

For government agencies and public sector institutions, video conferencing provides a cost-efficient way to extend the reach of your programs while delivering an authentic way to stay connected with your teams and partners. Secure and simple to use video conferencing solutions from GMeet connect office workers and field staff instantly, creating operational efficiency and strengthening relationships along the way.

Collaborate made Simple

Video conferencing used to be reserved for federal government departments with larger budgets. With GMeet video conferencing solutions, that same technology is at work at the state and local levels. GMeet saves local governments money by reducing travel while increasing interoffice training and education, multi organization coordination and community outreach programs. By providing government workers the outreach they need with video conferencing on computers, tablets and even smartphones, GMeet is bringing the public closer to those who serve them.

Operational Efficiency

Today more than ever, government agencies are expected to perform their duties in the midst of natural disasters, technological disruptions, pandemics and more. When an in-person meeting is not an option, GMeet video conferencing solutions ensure that lines of communication within and across government agencies remain open with video connections and secure file sharing, even when phone lines may be down.

Secure Communications

Government agencies around the world can be assured that GMeet video conferencing products meet rigorous government security, interoperability and performance requirements. GMeet video conferencing solutions are used daily for real-time video conferencing and recording/playback across the international government community, including the Department of Defence, all branches of the US military and multiple federal civilian agencies and departments.

Interoperable and flexible Solutions

Because GMeet offers options that are interoperable with other standard industry solutions and can be accessed on the desktop, tablet or mobile device, agency personnel can maintain operations anywhere—from their meeting rooms to their home offices.

Commitment to Standards and Security

GMeet is committed to delivering video communication solutions that meet the strict security requirements of government agencies while conforming to open standards and interoperability requirements for video, audio and data collaboration. In addition to supporting the most current standards, all GMeet systems support earlier standards to ensure backward compatibility with your existing communications infrastructure and minimize required investments.

Why integrate GMeet in your Government communication strategy?

SECURE COMMUNICATION

GMeet uses best-of-breed data centres with independent third-party security and privacy certifications to ensure the most secure and reliable foundation possible for our customers.

BEST-IN-CLASS 4K QUALITY

The GMeet VC ROOM 9200 and 90 series delivers 4K video and 4K content sharing to help users pick up on the fine detail needed when reviewing plans or monitoring equipment levels.

RECORDED MEETINGS

GMeet record and Share lets you record trainings, depositions, town-halls or status meetings and instantly saves them to your personal recordings library to view or share.

SUPPORT FOR BYOD AND BROWSER-BASED CALLING

Download the GMeet app for all of your devices or connect right from your web browser with the GMeet web app. All you need is a webcam, internet access and the link to the virtual classroom, and you're ready to connect.
